

Nahom Araya

(647) - 518 - 2082 | Arayanahom475@gmail.com | [My Github](#) | [My LinkedIn](#)

A collaborative and creative student of Software Engineering Technology, with applied experience in **object-oriented programming, database management, system analysis, and Knowledge of the Software Development Life Cycle (SDLC).**

EDUCATION

Centennial College | *Software Engineering Technology (Co-op)*

Dec. 2025

Relevant Courses: Unix/Linux Operating Systems, Java Programming, Advanced Database Concepts, Data Structures and Algorithms, C# Programming 3, Software Testing and Quality Assurance, Mobile Apps Development.

EXPERIENCE

Software Engineering Research Assistant

May 2024 - Dec 2024

Healthcare Systems R&A Inc. | Toronto, ON

- Work with other software students to implement remaining features of application and **improve existing functionality/user interface.**
- **Develop an ML algorithm** to analyze patient data and detect underlying conditions.
- **Develop mobile apps using Flask for the back end and react for the front end.**
- Work on **front-end app development** (desktop) and process and clean additional data for the app.
- **Integrate the signal processing** software with the game to allow control of the games using the **BCI.**
- Working on app design (images, backgrounds, and other drawings needed for the games and overall system).

Software backend Intern

Nov 2023 - April 2024

Avolta. Inc | Toronto, ON

- Specialized in back-end web and mobile development for a startup working on vehicle theft prevention.
- **Used Python with the Flask framework and SQL databases,** ensuring robust server-side functionality and data management for our applications.
- Designed and constructed **API** procedures while also producing comprehensive project documentation.
- Demonstrated **proficiency in Git and GitHub** and collaborated with team members using Git workflows.
- Collaborated with cross-functional teams, **participating in code reviews,** and contributing to project success
- Showed excellent **written and verbal communication skills** while working alongside different departments.

PROJECTS

Stock Trading News 

2024

Utilized **Python(Flask)** & **Twilio**

- Developed a **Python application** for real-time stock tracking and **data analysis,** integrating financial news updates.
- Leveraged **Twilio's SMS** capabilities to create a personalized alert system, ensuring users receive timely notifications about significant stock market events on their mobile devices.
- Employed Python to **analyze and parse data,** effectively identifying daily stock price changes to facilitate informed investment decisions.

Art Selling Platform 

2025

Utilized **ASP.NET Core** & **CRUD**

- Developed a robust art-selling platform using **ASP.NET Core with full CRUD functionality.**
- Designed and managed a relational database with **SQL Server and Entity Framework Core.**
- Implemented user-friendly **UI/UX** with responsive design using HTML, CSS, and JavaScript.
- Enabled dynamic Create, Read, Update, and Delete operations for artwork and user management

SKILLS & TECHNICAL TOOLS

Languages: Java, C#, Python, JavaScript & HTML/CSS

Technologies: Git, PowerBi, Jira, Pycharm, MS Visio, Visual Studio, MS Office, Excel, SQL, VBA

Libraries & Frameworks: Flask, Django, ASP.NET Core, Entity Framework, Spring, IntelliJ
